Dear Hiring Manager

Thank you for taking the time to review my resume. I am currently enrolled at triOS College in the Web Development program, and I am reaching out to inquire about any internship opportunities within your organization. My skills, experience, and education make me a strong candidate for such an opportunity, and I am eager to continue learning while beginning my career in the field.

As a Web Development student, I have gained experience in a wide range of front-end languages, including HTML, CSS, and JavaScript. Additionally, I have hands-on knowledge of back-end technologies such as MySQL, PHP, and working with APIs. My studies have covered the fundamentals of programming logic, web design principles, database management, and error debugging. Through an internship, I aim to further develop my skills and gain new experiences.

I bring relevant skills and experience from previous employment, where I worked directly with clients to understand their needs for new projects or to revise existing ones that required updates or modifications. I was responsible for quoting, managing, and organizing large projects, ensuring their successful completion.

In addition, I have extensive experience working with both 2D and 3D design systems, which has given me a solid foundation in CAD/CAM technology and an in-depth understanding of CNC programming. My hands-on expertise allows me to create precise, efficient designs and optimized programming solutions, even under tight deadlines. I am accustomed to managing time-sensitive projects without compromising quality, ensuring that deliverables are both accurate and timely. With my technical expertise, attention to detail, and commitment to excellence, I am confident I would be a valuable asset to your team.

Thank you again for reviewing my application. I look forward to the opportunity to discuss this position further.

Sincerely,

Justin DeMatteis
